

The Specialist Tyre Suppliers

Whether you are looking for turf, ATV or trailer tyres, agricultural patterns in the smaller tyre sector or tyres for the grounds maintenance fleet - Redstone has them all. You can be confident in drawing on a competent utilisation of products available to create a bespoke package for you. Your cutting-deck needs new wheels? Redstone has supplies. Puncture proof options? Redstone for Amerityre and Carlisle Reliance.

We stock a wide range of leading tyre brands including Carlisle, BKT and Maxxis. With our ability to supply most other makes on the market and with additional accessories and maintenance equipment, from tubeless valves to repair kits, you have everything you need for your tyre-fitting workshop.

At Redstone our purpose is to offer straightforward, reliable advice as well as competitive prices and a fast, professional service

Specific focus and dedicated supply to the grounds maintenance sector

Founded in 1999, Redstone has grown steadily into one of the leading importers and stockists of specialist tyres, distributing throughout the whole of the UK. The company continues to offer expert advice and knowledge to the market, building consumer confidence through providing reliable solutions. It has always been recognised that stock availability and fast delivery are of paramount importance in serving this industry.

Combined with this emphasis on service is an insistence on carrying a broad selection of tyres in stock, catering for a wide spectrum of machinery. Our advice and experience, together with our knowledge of what is required, means that we can find bespoke solutions for your particular problem - saving you both time and money. Whether it is your machine or your customer's machine - please enquire.

Our extensive range of tyres offers you varying tread patterns, optional ply-ratings and superior resistance to punctures where possible. Add to this a good stock of inner tubes, upmarket tyre sealant and puncture repair materials - this is Redstone. Tyre shops, machinery dealers, local councils and contractors can only benefit from drawing on this supply, held available for immediate despatch.

With tread variants, ply-rating options and brand variety to choose from, as puncture prevention specialists we are committed to delivering effective results for tyre users nationwide.

Tyres, the heart of our business. Here is an introduction...

Whether it is the Carlisle or Titan, Maxxis or Kenda, BKT or Duro, the eight tread patterns shown below, in our opinion give a concise overview of the core selection of tyres used for grounds maintenance.

Commercial Turf

If you're working on verges or open space and need a robust or hard wearing tyre, Redstone has a range of options for these applications. Please enquire about the puncture resistant alternatives.

Round-Shouldered Turf

Perhaps the existing tyres on your machine are marking the ground too much. Ask us about the selection of turf-friendly, round-shouldered tyres that are available.

Multi Rib

When it comes to the Multi Rib pattern, there are a number of variants performing different functions. From the hay turner to the utility vehicle, Redstone covers them all.

Smooth

Principally fitted to machines that operate on very fine grass areas, like golf greens. A small number of manufacturers and sizes, with some variations in ply rating.

Knobbly

This tread pattern is often used on ATV's or on turf machinery where more grip is needed. Ask about the different sizes and brands that are stocked.

HD All Terrain

Sometimes you might need more aggression or a heavier duty tyre. Giving plenty of wear on a variety of surfaces, there are a few patterns offered in a limited number of sizes.

Aggressive ATV

You will not find a better tread formation for ultimate grip in extreme conditions than this rugged, directional ATV tyre. Several manufacturers and tread variants.

Tractive Open-Centre

The Open-Centre or Tractive pattern is fitted to a wide range of machinery, from the rotavator to the large agricultural tractor. This self-cleaning tread pattern remains an all-time favourite where real grip is required.

Tyres for your range of machinery - solutions for your mower fleet
